

ABSTRACT OF THE DISCLOSURE

5 An accessory strip for a vehicle having a bracket secured to a track at select locations. The bracket includes a cam on an inner end that is received by a cam lock bar. The cam is movable within the track to selected positions where it may be locked in place. The bracket may include a dovetail socket to which articles may be secured by means of a dovetail plug and also may include a hook on which articles may be hung by means of flexible handles, or the like. The accessory strip assembly may be attached to an interior wall or may be formed as an integral track on an interior wall or seat back of a vehicle.
